

## IV SEDATION FACT SHEET

At Tindale Dental we believe most people want to be healthy! We welcome everyone who comes seeking a preferred level of health, providing information that allows people to make intelligent choices regarding their dental health. We offer the highest quality dental care by being well trained, current in our techniques and attentive to our patients' needs, wants and desires.

Our team, headed by **Dr Justin Currie B.D.S. (Syd Uni) Grad Dip Clin Dent**, is comprised of top quality professionals with the highest credentials who work in conjunction with each other, joined together through a strong belief that how we provide dental care today makes all the difference in what your oral health will be twenty years from now. Our goal is to create an environment where a strong relationship between you and our team can be established.

*It is our fundamental belief that the manner in which you treat children establishes patterns for the rest of their life. Our highest responsibility is to create an environment where children can receive the highest quality care in an environment in which they feel comfortable.*

**Dr John Vassiliadis MB BS, FACEM** provides all the administration of sedation at Tindale Dental. He is an Emergency Medicine Specialist who is currently at the Royal North Shore Hospital. He has had training in sedation, anaesthesia, trauma management, trauma ultrasound and toxicology. John is currently a Lieutenant Commander in the Royal Australian Navy Reserves and was part of Australia's medical relief force that was sent to Indonesia after the Boxing Day tsunami. He has a keen interest in medical education and is involved in training doctors at all levels.

### Sleep Dentistry – IV Sedation

Imagine waking up feeling refreshed and confident that sedation dentistry has changed your life. Once you've experienced sedation dentistry, you'll never fear the dentist again. With our gentle technique, you'll be sedated just enough to be unaware of the treatment. Years of dental treatment can be completed in just one visit.

### How Sedation Works

Undergoing sedation dentistry eliminates the anxiety many experience regarding dental treatments. Under the care and experience of the Tindale Dental team, you are placed in a dream-like state, allowing our dentist to perform even the most complex treatments.

## Common Questions

### Will I feel any pain?

You will feel no pain and have little memory of your treatment.

### Will I be monitored?

Yes, a specialist doctor is always with you and your vital signs are monitored during the entire visit.

### Will someone need to accompany me?

Yes, due to the sedative effects of the medication, you will need someone to drive you home after treatment and discuss with our dentist the post-operative information.
